Ditto. The IRIS program folks have a system now for noting stakeholder requested meeting and making their materials available to the public: <https://cfpub.epa.gov/ncea/iris2/events.cfm#stakeholderMeetings>

I'm looping in Vicki to see if she has guidance for us.

I would imagine we would like to learn what they have done.

Subject: meeting request

Dear Dr. Kraft,

Hope this email finds you doing well. I am writing with regards to a potential meeting to discuss some recent work that we have been conducting for formaldehyde. Dr. Ken Mundt and I recently acquired the raw data underlying two of the key studies (i.e., Beane-Freeman et al. 2009; Zhang et al. 2010) cited in support of the original conclusion in the IRIS Draft Formaldehyde Toxicological Review that formaldehyde causes leukemia. We have reanalyzed these data, both in the context of the authors conclusions, as well as in response to NAS comments regarding the use of these studies in estimating Inhalation Unit Risk factors. We also have performed analyses not previously conducted (or at least not reported) in the original publications. The results of these new analyses are important, and will be critical to drawing valid conclusions in the revised Formaldehyde Toxicological Review, as well as the weight of evidence for formaldehyde exposure and leukemia.

Dr. Mundt and I will be in Washington for other meetings on Tuesday, October 11, 2016 and wondered if we might have an hour or two of your time in the morning to discuss with you this new science? Please let me know at your earliest convenience.

Best regards,
Robinan
